

Global Mobility Hackathon

NITI Aayog is organizing MoveHack 2018, a global mobility hackathon to crowdsource solutions aimed at the future of mobility in India. Envisaged to be one of the largest hackathons globally, Move Hack is focused on 10 themes and structured over three legs: online, followed by Singapore leg, and the finals in New Delhi.

MoveHack aims to bring about innovative, dynamic and scalable solutions to problems pertaining to mobility. The hackathon has two-pronged campaign approach: (a) “Just Code It”: aimed at solutions through innovations in technology/product/software and data analysis, and (b) “Just Solve It”: innovative business ideas or sustainable solutions to transform mobility infrastructure through technology.

Move Hack is open to individuals of all nationalities, making it a truly global hackathon. Registrations are open at <https://www.movehack.gov.in>. The top 30 teams from the online submissions will travel to Singapore for two days (1 and 2 Sep 2018) and will be mentored by a curated group of top experts advising the teams on a host of parameters including design improvement, business viability, technical solution and customer targeting/marketing. The top 20 teams from Singapore leg will participate in the Final Round to be held in New Delhi on 5 and 6 Sep 2018.

The winners will be announced during the Move Summit 2018, which is also organized by NITI Aayog on 7 and 8 Sep 2018 in New Delhi (<http://movesummit.in/>) and is being inaugurated by the Hon’ble Prime Minister of India. Awards for the hackathon include recognizing top 10 winners, with a total prize of more than Rs. 2 crores.

We would request your institution’s support in spreading the word around for this marquee event. Please share it extensively with your network and work with NITI Aayog in building the India of tomorrow.
